## Professional Experience

- Present **Teaching and Mentoring**
  - Teaching is one of my passions, contributing with knowledge to people around me helps me to grow with them. That is why in my free time I help others to understand and acquire some knowledge of my profession, as well as give courses to clients of some tools.
- Jul 2017 - Present **Developer** Kudaw S.A.
  - 🏆 Versatility Recognition - Engineer of the year 2019
  - 🏆 Dedication Recognition - Engineer of the year 2018
  - Currently I work as a software analyst and developer for Big Data, Banking, AI and other environments. My main function is to deliver software development solutions and problem solving for our different teams and also for our clients. I have developed software under the context of AI, banking transactions (Visa and Mastercard), web development, servers and more.

Aug 2016 -  
Nov 2016

**Training: Software Engineering**

Estudio Suma S.A.

- My main job was based on learning to develop in PHP to later provide support to the back-end development team, I was also responsible for keeping updated the websites of different clients using the CMS Wordpress and Prestashop.

Mar 2013 -  
Nov 2014

**Teaching Assistant**

Universidad Finis Terrae

- I worked as a teaching assistant in extra-scheduled hours and I was the laboratory instructor of the Civil Engineering career. My role was to reinforce and support the programming courses based on Python and C languages.

Oct 2012 -  
Dec 2012

**Training: Associate Degree in Computer Networking** Conectados Chile S.A.

- My work consisted of providing support to the entire Call Center keeping all workstations up and running, as well as installing the Vocalcom system, installing new workstations, making RJ45 cables, server backup and general support for all the company's employees.

Nov 2011 -  
Feb 2012

**Supplier Department Accountant**

Viña Carta Vieja

- In Viña Carta Vieja I worked as an accountant in the suppliers area. My function was based on analyzing the invoices issued by the suppliers, approving them and making the journal and general ledger in Softland's accounting software.
